

ORTAC

**FALCON
2000LX**

Welcome TO ORTAC.

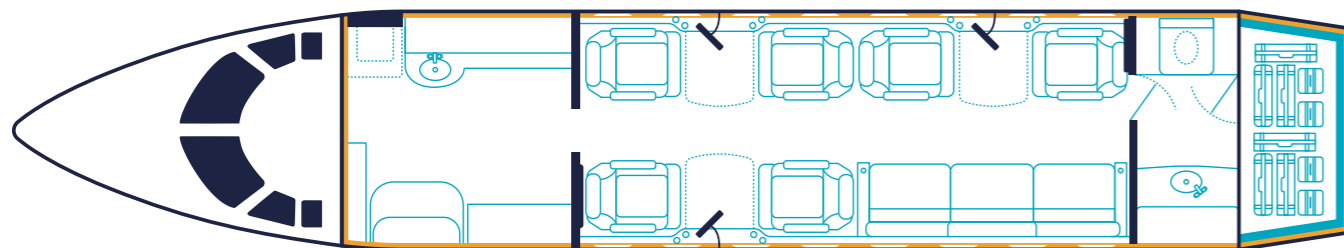

The human way to fly.
Fly on demand to over 500 destinations across Europe.

The private jet company fuelled by a passion to serve. With over 30 years experience in business aviation, we provide every professional service from our headquarters at Jersey Airport, in the beating heart of European airspace. We are an independent operator that puts its clients first in everything from aircraft management to commercial charter and private jet purchases. Think of us as your in-house flight team, working 24/7 to manage your operations in the air and on the ground.

DVD, Inflight displays

VIP Catering
on all flights

Restroom —
enclosed private
toilet / vanity facilities

Air-Conditioned
and pressurized cabin

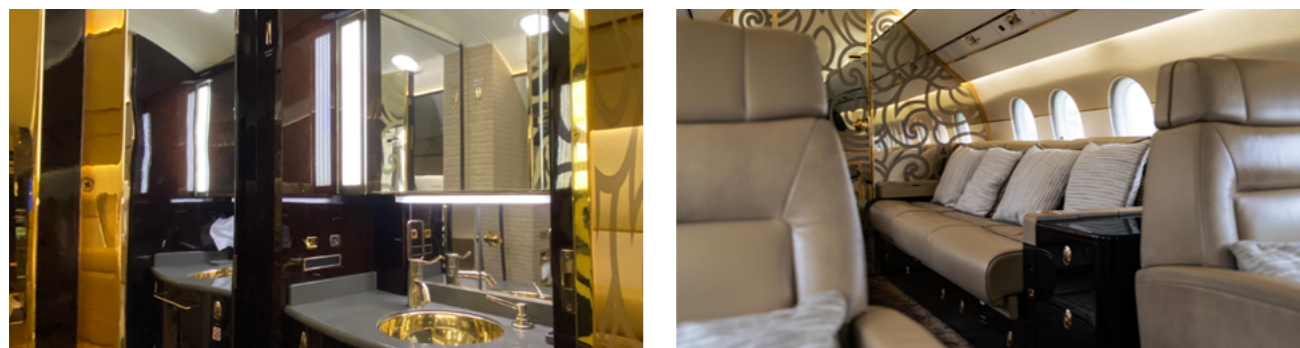

External baggage
compartment / internal
personal carry-on items

Unmatched performance, **FLEXIBILITY AND COMFORT.**

When we flew in this golden, sleek beauty from Kuala Lumpur earlier this year, we knew our clients were in for something special.

A perfect balance of performance and economy, the Falcon 2000LX is powerful and efficient, with the spacious comfort and exclusive refinements you need for a longer flight. What's more, with its beautifully blended winglets and upgraded engines, this is one of the leanest, greenest, most efficient private jets in the skies.

Travel quietly, graciously, **PRODUCTIVELY.**

The Falcon 2000LX shines on typical, inter-continental nonstop flights between cities like Paris, London and New York, Singapore and Sydney or Mauritius.

It is also brilliant on missions that are beyond the capabilities of comparable jets. Especially from challenging airports with steep approach angles, like Aspen, Colorado, Switzerland. At maximum takeoff weight, the Falcon 2000LX uses 1000 feet (305 m) less runway than its closest rival.
