PHENOM[®] 300E
BY EMBRAER

Welcome TO ORTAC.

**The human way to fly.
Fly on demand to over 500 destinations across Europe.**

The private jet company fuelled by a passion to serve. With over 30 years experience in business aviation, we provide every professional service from our headquarters at Jersey Airport, in the beating heart of European airspace. We are an independent operator that puts its clients first in everything from aircraft management to commercial charter and private jet purchases. Think of us as your in-house flight team, working 24/7 to manage your operations in the air and on the ground.

compartment / internal
personal carry-on items

The baggage compartment
can hold up to 12 bags,
assuming your average
piece of luggage is not
more than medium sized
baggage

Comfort and convenience AT ITS FINEST.

Largest baggage compartment in its class

Externally serviced lavatory

Opening up a world OF POSSIBILITIES.

The Phenom 300E takes you farther, faster and to more places worldwide than any other light jet. Its nonstop range at long-range cruise speed is 1,971 nm. An impressive reach. And at its fastest, the aircraft can reach Mach 0,78.

The Phenom 300E also extends your domain in other ways. The light aircraft can take off at maximum weight in just over 3,000 feet (SL, ISA) and delivers superior hot-and-high performance, giving you direct access to many desirable destinations.

With best-in-class speed, range and field performance, the Phenom 300E demonstrates its ability to transcend the perceptions of light jet capabilities. Proof of just how far you can go with an approach that begins by rethinking everything.
